

## INTRODUCING THE COMPLETE LED ANTI-COLLISION LIGHTING SYSTEM

FOR MOST COMMERCIAL TRANSPORT & CARGO AIRCRAFT

- Lighter weight and lower power consumption
- Modular design offering reduced inventory costs
- Longer life and increased reliability
- Reduced replacement and maintenance costs
- Designed to remove 25-35 pounds off the aircraft
- Simple plug & play installation (simple plug & play)

Centerline Beacon

Currently FAA-STC'd on Boeing 757, 767 Issue ST03574AT  
Airbus 300, 310, 320, 330, 340.

## NO MORE COSTLY DELAYS OR PROBLEMATIC MAINTENANCE ISSUES

# Wamco

Aerospace lighting

## Talon

AEROSPACE

## LED Anti-Collision Lighting System

- Upper & Lower Lights are Self-Contained (no external power supply)
- Wing Tip Lights (lightweight power supply)
- The Latest Solid-State LED Technology
- Product Commonality (fits multiple aircraft models)
- Reduces Inventory Costs
- Increases Reliability
- Shatter Resistant Lens (low replacement cost)
- Modular Design Incorporating Same Parts\*
- Reduces Costly Repairs & Overhaul Removals

### One unit covers these models:

B717	DC9	A300	A320
B757	DC10	A310	A321
B767	MD11	A318	A330
B777	MD88-90	A319	A340

\* Only part change is mounting plate.

Patent Pending
